GENERATIONS AHEAD IN THE ARCHITECTURAL INDUSTRY

Our new GFRG Hinged Access Panel is a new innovative patent pending design by IntexForms Inc. Much like our lift & shift ceiling panel, our hinged panel has the same strength, durability, quality and looks very appealing.

The hinged panel is as simple to install as a piece of drywall the same size. Unlike metal panels our panel is rigid and will not twist, if screwed to an even surface.

Simply screw it, tape it, paint it and leave it.

Constructed of glass fiber reinforced gypsum, non combustible

Continuous aluminum piano hinge for added support

Supplied with optional cam locks (slotted or keyed) please specify
